

Example HFT Hit Zone Target Practice Cards

Range in Yards	Target Distances									
0	8	10	13	15	20	25	30	35	40	45

15 mm	0	8	10	13	15	20	25	30	35	40	45
-------	---	---	----	----	----	----	----	----	----	----	----

20 mm	0	8	10	13	15	20	25	30	35	40	45
-------	---	---	----	----	----	----	----	----	----	----	----

25 mm	0	8	10	13	15	20	25	30	35	40	45
-------	---	---	----	----	----	----	----	----	----	----	----

30 mm	0	8	10	13	15	20	25	30	35	40	45
-------	---	---	----	----	----	----	----	----	----	----	----

Target may be partially obscured by flora but must be shoot-able without danger from ricochets. Minimum of 50% of the hit-zone visible

35 mm	0	8	10	13	15	20	25	30	35	40	45
-------	---	---	----	----	----	----	----	----	----	----	----

Target may be partially obscured by flora but must be shoot-able without danger from ricochets. Minimum of 50% of the hit-zone visible

40 mm	0	8	10	13	15	20	25	30	35	40	45
-------	---	---	----	----	----	----	----	----	----	----	----

Target may be partially obscured by flora but must be shoot-able without danger from ricochets. Minimum of 50% of the hit-zone visible

45 mm	0	8	10	13	15	20	25	30	35	40	45
-------	---	---	----	----	----	----	----	----	----	----	----

Target may be partially obscured by flora but must be shoot-able without danger from ricochets. Minimum of 50% of the hit-zone visible

Course Structure (Note this example is based on one of the many highly regarded HFT organizations rules at time of press and some variations can occur across many of the well run organizations)

- " Hit zone sizes range from 15mm to 45mm.
- " The maximum range is 45 yards.
- " The minimum range is 8 yards
- " Reduced hit-zone 15mm targets are restricted to a range of between 13 and 25 yards maximum
- " The 20 mm targets restricted to a range of between 8 and 30 yards
- " The 25mm targets restricted to a range of between 8 and 35 yards
- " The 35 to 45 mm targets have no range restriction between the max and min range of between 8 and 45 yards

Additional Challenges

- " The 30 mm to 45 mm targets may be partially obscured to a level of up to 50% by flora.
However, these targets must be able to be shot from the shooting position without danger of a ricochet.
